

We are THI (Truth, Honor & Integrity),  
a group designed with the sole purpose  
of improving life and humanity.

We operate under the premise of  
the benefit of the all.

We recognize our world is in a total mess  
and it cannot be fixed in its current format  
and so we endeavor to come up with  
solutions that will aid us all.

Essentially a new blueprint  
for how humanity and the world  
should be and operate.

Are you ready for Solutions?

# THE NEW BLUEPRINT FOR HUMANITY

**a comprehensive overview  
of the issues facing this country  
and the world**

**problems, problems, problems....  
our children deserve better - it's time for**

# SOLUTIONS!

We cannot continue in the current mode of corruption, fraud, deceit and malevolent ways, that is attuned for the few to benefit at the expense of the all. We, the people have hardly helped that situation, as we have dissolved our personal and collective responsibility over to people and a system designed to work against us. We can no longer sit back and do nothing and expect the world to be fixed for us, that has never happened and never will. We have to have not only an input, but our say in how the world should be run.

This will be the first time the people have come to the fake authorities and demanded a say in how the world should be operated. All peoples are welcome to join us in this endeavor, so we can have a brighter future for us all. We do not expect for you to agree with all in **The New Blueprint For Humanity** document, but welcome where improvements to it can be made. The whole idea is, we all come together to make this world in our image and likeness, not in their image as that has failed us all. We have on-line communal gatherings for topics that interest you in relation to this blueprint, and invite all to participate.

The key is not to complain, have egos and be competitive, but to find common ground and work towards delivering this in a cooperative way. Our members have put great thought, time and effort into this for the benefit of the all, so let's come together to improve it further. We will require input from the many, including governments and officials, military and agencies etc. to formulate and expand upon the plans laid out in **The New Blueprint For Humanity**. We are flexible with the approach to this and understand this can only be accomplished over a period of time in a phase-in and phase-out motion.

The full target completion of this blueprint is 40 years or two generations, due to having to teach two generations to operate in a better way. Many improvements can be made within the first year and much can be accomplished within a 3-5 year timespan. Why must this be done? Because the world we knew has fallen apart and it cannot be fixed on any level. New ways that benefit the all is a must for us to be considered an advanced civilization. Time for us all to put on our adult pants, stop acting like children and blaming everyone else. Come together in a lasting and real way and let us all build something to be proud of.
